# What is Wu Detecc

<https://wukongproject.com/detect/>

As the ultimate DYOR tool, Wu Detecc presents an all-in-one solution to the matter of time-consuming research into token projects. It provides users an overview of the most abundant information about a crypto token project on one single page.

**With a user-friendly interface**  
easy to use,  
require only the  
token addresses

**Gather the comprehensive evaluation of token projects**

**Provide a time-efficient manner**  
all information  
within one  
single page

**Unleash the immense power of community's sentiment**

# What can you find on Wu Detecc?

# Wu Detecc All-In-One

“ Our desiring vision and mission is to establish more security in the crypto space and support valuable legit projects. ”

The screenshot displays the Wukoin project page on a blockchain explorer. At the top, the Wukong Project logo and address are visible. The main content area includes:

- Wukoin (WUK) WuScore:** A circular gauge showing a score of 97, with 5 stars and a 'Community Sentiment' label.
- Contract scan:** A section with a green checkmark indicating 'The token seems sellable' and 'Contract readable on Etherscan'. It includes a note about prelaunch phase results and a 'Last scan: 0 min ago' timestamp.
- Taxes & Gas:** A table showing buy and sell taxes and gas costs.
- Total Supply:** A section showing the total supply of 1000000000 WUK, with 0% burnt in the creator's wallet.
- Liquidity:** A section showing 100% liquidity, with 1. Team Finance - 100% and 13 days.
- Reviews:** A list of user reviews with star ratings and text.
- Wukoin Top Holders:** A list of the top 6 holders of the Wukoin token.

Holder	Percentage
1. Uniswap V2: WUK	27.73%
2. Wukong Project: WUK Token	23.01%
3. *marketing.wukong.eth	8%
4. *charity.wukong.eth	6.73%
5. 0x...	1.73%
6. 0x...	1.68%

# What is WuScore

A dynamic and flexible scoring system that measures the transparency and trustworthiness of a project.

It's elaborated in real-time by an algorithm that calculates the average between different-weighted partial scores, based on multiple information:

- ✓ Red flags in the contract,
- ✓ Presence of a liquidity lock,
- ✓ Taxes & gas efficiency,
- ✓ Presence of social links, website & white paper,
- ✓ Listing status on Wu Detecc,
- ✓ Community sentiment, etc.

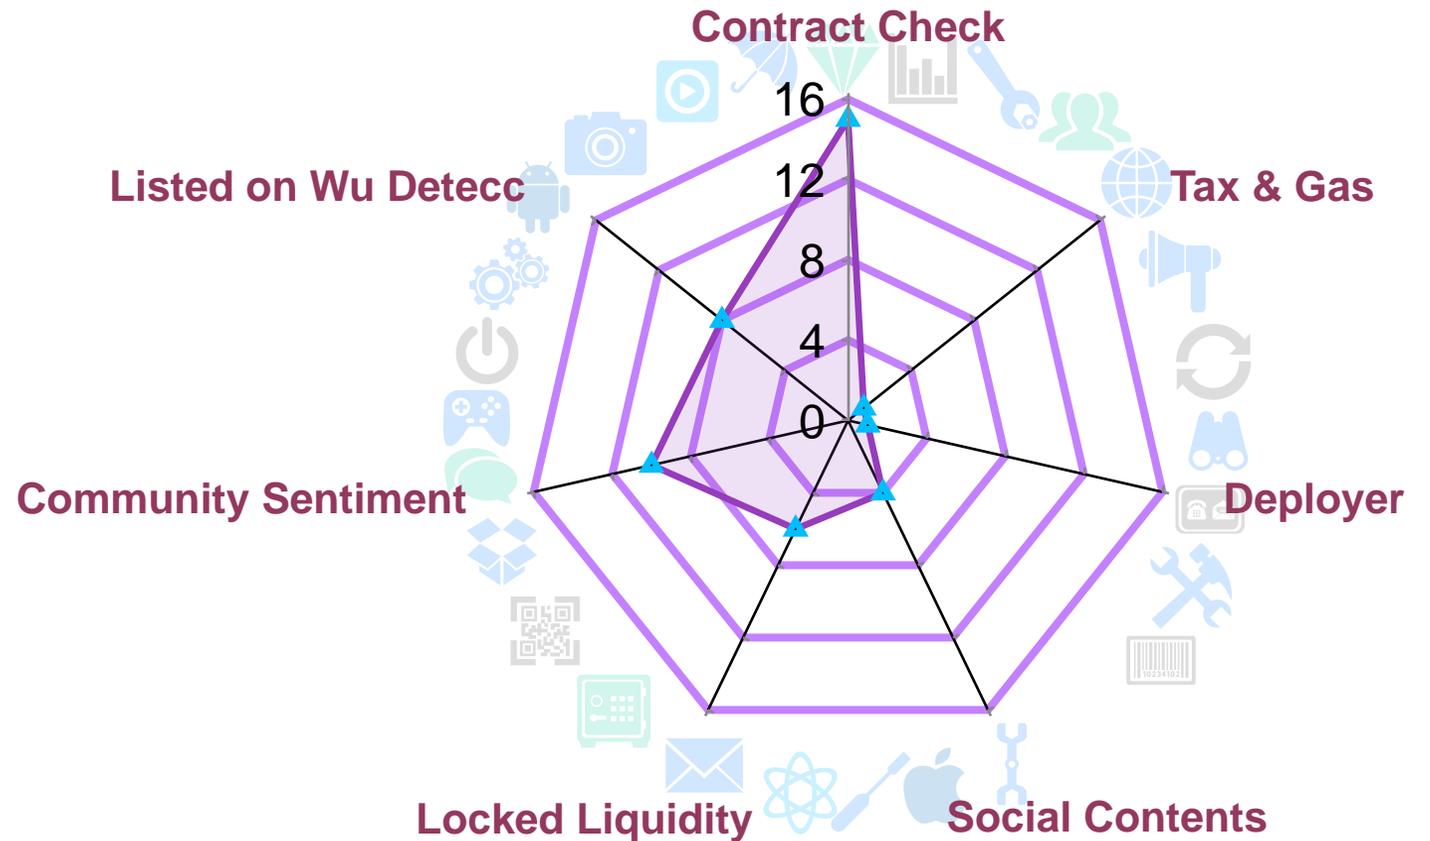

# Wu Score

**Each partial score comes with a different weight.**

Based on the importance that element has in our opinion and which gets tweaked over time to reflect more and more the trustworthiness and quality we look for in a project.

\*The weight of WuScore is subject to change as a result of experience, new information, changes in process requirements and the availability of resources.

Weighting Scale Of WuScore

# Why it stands out from the major token scanning tools

## The first “user-orientated” scoring system

### What do others say

Wu Detecc offers 2 tiers. In the Rookie Version (FREE) users are able to read reviews left by crypto enthusiasts of searched projects.

### What are your opinions

In the premium version, the WuDetective, users are able to leave comments & ratings. There are no minimal Wukoins (WUK) required to upgrade. Each Wukoin counts.

### Stronger together

The average ratings impact the score of “community sentiment”. Which is depicted separately below the total WuScore.

# Decentralised Rating Platform

## Community Sentiment

- Why individual investors are the key
- Quality and quantity in the rating system
- DeFi at its finest

# Why individual investors are the key

## Statistics do not mean anything

Numbers can not lie but can not draw the whole picture either.  
The number of holders & community members can be manipulated.  
Charts alone can't imply the causation.

## Token scanners can't detect everything

Token scanners evaluate chain codes and smart contracts, vet transactions and inspect top holders. But they can't say whether a team is going to abandon their project in a short time.

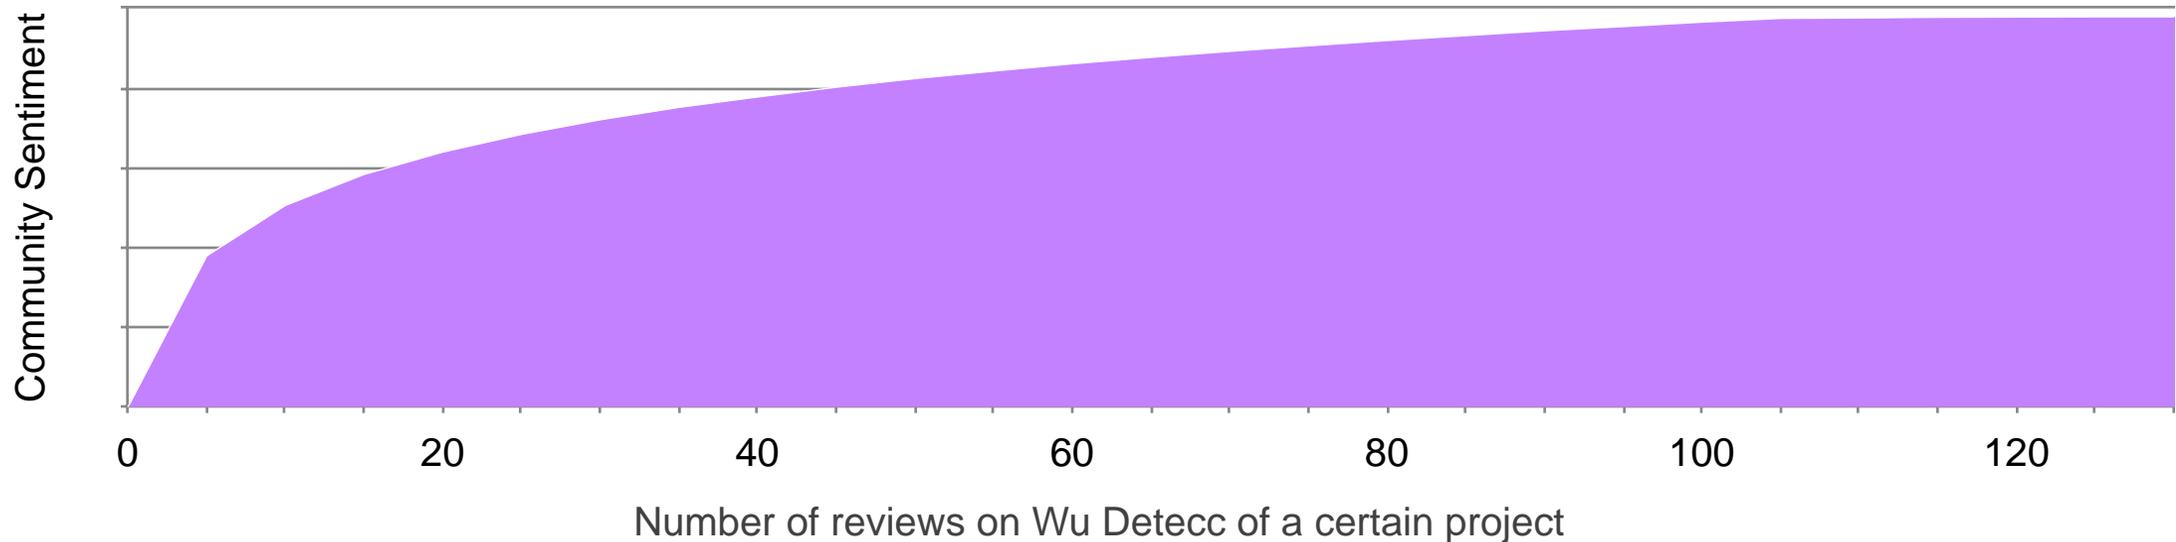

## Individual investors know the projects the best

The team determines the destiny of a project, not the smart contract itself. And only investors/community members know the team the most. No matter trust or suspicion, they are results of inter-human communication.

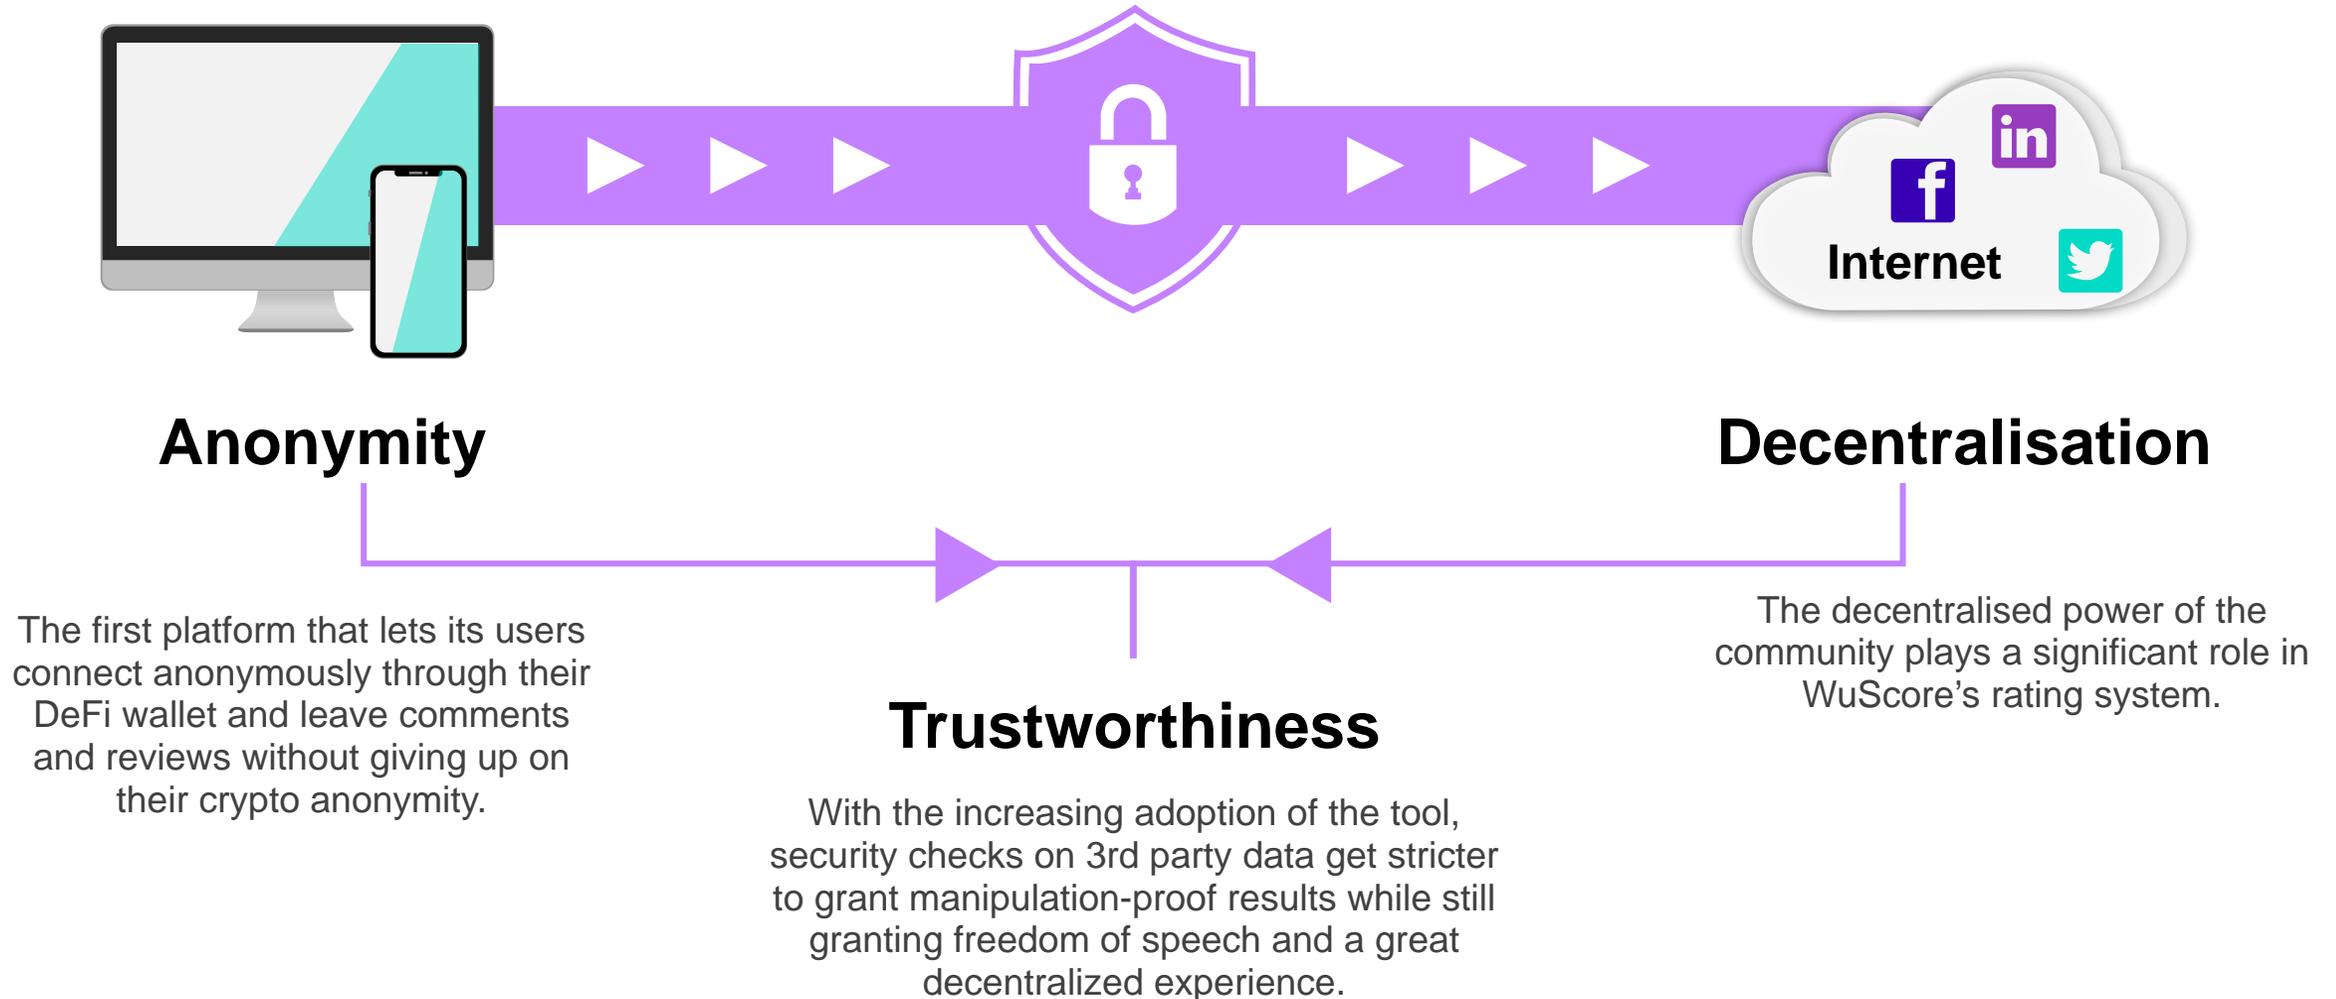

# Quality and quantity in the rating system

correlation between scoring weight and the number of reviews

The more the reviews, the higher the impact.  
WuScore and its mechanism ensure that the voice and the experience of a huge amount of community members count for more than a handful of individuals.
